Why Restaurateurs Choose DineLoom: Traditional restaurant setups force owners to balance multiple disconnected screens—one for Swiggy, one for Zomato, a bulky computer for billing, and handwritten paper slips for kitchen communication. DineLoom collapses this chaos into one sleek, reliable cloud platform that operates effortlessly on iPads, Android tablets, laptops, and smartphones.

Core Platform Architecture & Modules

Built with state-of-the-art web technology for speed, resilience, and maximum dining revenue.

1. Advanced Cloud POS & Billing

Full-featured point of sale with real-time floor plans, split billing, digital KOT printing, shift management, and multi-tender settlement.

2. Frictionless QR Table Ordering

Guests scan a tabletop QR code with their mobile camera to explore high-res dish photos, filter preferences, and place orders without waiting.

3. Kitchen Display System (KDS)

High-contrast kitchen display replacing paper tickets. Features sound chimes for new orders, prep timers, and a one-tap ORDERED -> PREPARING -> READY flow.

4. Aggregator Pipeline (Swiggy / Zomato)

Consolidates third-party delivery channels into your central KDS. Update menu items, prices, and 86-lists in one master console.

5. Integrated Payment Settlements

Support for direct UPI QR code generation, Razorpay, PhonePe, Cashfree, and Stripe. Automatic reconciliation and split settlement reports.

6. 100% White-Label & Custom Domain

Run on your own custom domain (e.g. order.yourbrand.com) with custom brand colors, logo, and zero middleman branding. Full analytics suite: sales heatmaps, item margins, Excel export.

■ The 10x ROI Calculation for Restaurant Owners:

- A typical 25-table restaurant serves 100 tables on weekends with an average bill of ■800 (■80,000/day).
- With DineLoom QR Ordering & KDS, order turnaround improves by **25%**, enabling **5 to 8 extra tables** during peak hours.
- Extra weekend revenue generated: **■4,000 to ■6,400 per weekend** = over **■20,000 to ■35,000 extra profit monthly**.
- At just **■1,999 / month**, DineLoom costs less than ■67 a day and pays for itself within the first 48 hours of every month!

Zero-Risk 14-Day Pilot & Next Steps

Get started with zero risk, zero hardware purchase, and zero operational downtime.

Step 1: 15-Minute Menu Digitization

Share a picture or PDF of your food menu via WhatsApp. Our onboarding team uploads all items, prices, dietary tags, and photos into your DineLoom dashboard within 15 minutes.

Step 2: Table QR Standee Setup

We provide acrylic tabletop QR standees branded with your restaurant logo. Simply place them on 3 to 5 corner tables to begin testing.

Step 3: Dual-Mode Weekend Test

Keep your existing cashier computer as normal. Run DineLoom on your test tables. Notice how orders reach your chef in under 2 seconds without paper tickets.

Step 4: Go Live & Upgrade

At the end of 14 days, activate your plan starting at ■1,999/mo with 1-click online payment. Cancel anytime with zero commitment.
